

THE PRIME MINISTER'S OFFICE
REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT
BUSEGA DISTRICT COUNCIL
FORM ONE TERMINAL EXAMINATION
CHEMISTRY

TIME: 2:30 HOURS

MAY, 2026

INSTRUCTIONS

GEPAM science hub

WhatsApp 0748978398

1. This paper consists of sections A, B and C
2. Answer all questions in section all section in the spaces provided.
3. Read carefully the instructions given in each section before answering the questions.

SECTION A

Answer **all** questions in this section

1. For each of the items (i) – (x), choose the correct answer from among the given alternatives and write its letter in the box provided.

- (i) Form one students went to the laboratory to measure fixed volume of distilled water.

Which apparatus can they use?

- A. Beaker C. Pipette
B. Burette D. Measuring cylinder

- (ii) Mzee Ujugu studied and deals with chemistry in ancient time or before Christ. Mzee Ujugu will be considered as:

- A. Scientist C. Chemists
B. Chemist D. Alchemist

- (iii) A form one students saw a flammable sign on a box. Suggest that box is likely to contain

- A. Papers. C. Kerosene.
B. Firewood. D. Radioactive materials.

- (iv) What are some of the main purpose of vaccine as a chemical substance?

- A. Protect animals and human being from diseases.

- B. Cure animals and human being from disease.
- C. Make animals grow faster than the normal.
- D. Introduce vitamin and protein in animals.

(v) Ngoma is proud of using many important products in her farm and livestock made by application of chemistry. Which of the following sets consists of these products?

- A. Varnish and coolant. C. Baking powder and petrol.
- B. Disinfectant and freshener. D. Weed killer and pesticides.

(vi) Imagine you are a class monitor and your chemistry teacher asked you to remind your fellow students on the laboratory rules to be adhered before practical activities. Which rule will you insist to your fellow from the following?

- A. Do not taste or smell chemicals.
- B. Do not enter in the laboratory without permission.
- C. Do not use dirty, cracked or broken apparatus.
- D. Report any accident however small may be.

(vii) If a form one student aspires to be a professional farmer, which among the following subject a student should be advised to focus on in order to develop the necessary competencies?

- A. Biology, chemistry and agriculture.
- B. Geography, physics and mathematics. C. Physics, mathematics and biology
- D. Chemistry, physics and biology.

(viii) Kidunda was preparing a stock solution of concentrated sulphuric acid in the laboratory. Suddenly the sulphuric acid spilled on his skin. What action should be taken immediately after that accident?

- A. It should be neutralized with concentrated Hydrochloric acid.
- B. It should be washed with plenty large running cleaning water
- C. It should be neutralized with concentrated Sodium hydroxide.
- D. The affected area should be shown to a medical health doctor provider

(ix) When a chemist study about matter such as water, he/she will be interested in;

- A. Shape of water.
- B. Volume of water.
- C. Properties of water.
- D. Density of water.

(x) The chemistry teacher gave students a list of laboratory apparatus and asked them to drop/put aside those which are not related to chemistry. Which list could be dropped?

- A. Burette, pipette, and conical flask.
- B. Wire gauze, test tube rack and pipette.
- C. Drawing board, prism and microscope.
- D. Beaker, burette and measuring cylinder.

Answers

2. Match the items found in the First Aid kit in LIST A with the corresponding uses in LIST B by writing the letter of the correct response beside the item number.

LIST A	LIST B
--------	--------

(i) Clinical thermometer	A.Cleaning and drying wounds.
(ii) Liniment	B.Cleaning wounds to kill germs
(iii) Antiseptic solution	C.Measuring the body temperature
(iv) Sterile gauze	D.Reducing muscle pains
(v) Cotton wool	E. Covering wounds to protect them from dirt and germs
	F. Covering the hands to avoid infecting wounds and to prevent direct contact with a victim's body fluids

LIST A	I	II	III	IV	V
LIST B					

SECTION B (70 marks)

Answer **all** questions in this section

3. (a) How does chemistry influence the development of a modern society? (Give 4 Points)

(i) _____

(ii) _____

(iii) _____

(iv) _____

(b) Briefly explain how chemistry is applied in the following fields?

(i) Agriculture

(ii) Medicine

(iii) Transport

4. (a) When back at home from school your nephew asked you to mention four professional careers you will attain through studying Chemistry subjects. What will you tell your nephew?

(i)-----

(ii)-----

(iii)-----

(iv)-----

- (b) Identify six apparatus found in the chemistry laboratory which are made up of glass materials and state one function for each.

(i)-----

(ii)-----

(iii)-----

(iv)-----

(v)-----

(vi)-----

5. On your holiday, you travelled to Arusha to visit your uncle, after arriving you founded that your uncle has a project of building a manufacturing industry which will be processing the product such as

- 1) Glass material 4) Pesticides
- 2) Petrol fuel 5) Hydrogen peroxide
- 3) Concentrated acid

From product number 1 up to number 5 identify and draw the warning signs/ safety symbol that will be placed in each product.

Warning sign on the product	drawing
1)	
2)	
3)	
4)	
5)	

--	--

6. (a) With examples state three states of matter

(b) Complete the following related to process of changing state of matter

- I. Water to ice.....
- II. water to vapor.....
- III. steam to water.....
- IV. vapor to water.....

7.(a) Students went to camp in an isolated area where they needed to make tea using a portable gas stove

Which type of flame would be selected, and what are the four practical reasons behind their choice

(b) A student was preparing food for the family by a deep-frying method using cooking oil and cooking pan. Accidentally the cooking pan tipped over and a huge fire spread on the kitchen floor.

(i) Identify the class of fire that occurred in the kitchen-----

(ii) Which fire extinguishers would be suitable for putting out the fire? Explain

8 (a) What type changes are these?

(i) Cloud changing into rain-----

(ii) Magnetizing of iron-----

(iii)Heating an iron rod-----

(iv)Rotting of mangoes-----

(v)Decaying of teeth -----

(b)Explain briefly four real -life examples that illustrate the kinetic nature of matter.

9.(a) Mention five accident that may occur in chemistry laboratory

(b) Mention five causes of accident in the laboratory

.....
.....
.....
.....

SECTION C (15 MARKS)

10. (a) Draw a well labelled diagram of a small laboratory heat source consisting of a vertical metal tube through which a mixture of gas and air burns to produce controlled flame.

(b) Describe how you will light a device drawn above;
