FORM ONE MID TERM EXAM

24th MARCH, 2026

CHEMISTRY

TIME: 2:00HRS

Student's Name

GEPAM science hub

WhatsApp 0748978398

Instructions

1. The paper consists section A,B and C answer all questions in each section.
2. Use blue or black ink only and pencil for drawing.

SECTION A (15Marks)

Answer all questions in this section

1. Choose the correct answer then write its letter in the bracket provided.

i. My uncle's career deals with composition, properties and the changes that matter undergoes, how do we call my uncle?

(A) Alchemist (B) Biochemist (C) Chemistry (D) Chemist

ii. Which one of the following is **NOT** product made by the use of knowledge of chemistry in agriculture?

(A) Paints (B) Fertilizers (C) Weed killers (D) Animal vaccines

iii. What are some of the main purposes of vaccines as chemical substance?

(A) Cure animals and human beings from diseases (B) Protect animals and human beings from diseases

(C) Introduce vitamins and proteins in animals (D) Make animals grow faster than normal

iv. A chamber in the Referral hospital was labeled "Biohazards only". Which materials are likely to be contained in the chamber?

(A) Waste matters (B) Clinical wastes (C) Inflammable materials (D) Chemical effluents

v. When Aminadab suddenly fallen down and lost consciousness her friend took him to near health facility after diagnosis a doctor found that condition was caused by lack of sufficient blood and oxygen to the brain. How do we call this situation Aminadam suffered from?

(A) Suffocation (B) Chocking (C) Bruises (D) Fainting

vi. In rendering First Aid to an electric shocked victim, you must primarily think of;

(A) Checking whether the victim is breathing. (B) Putting the victim in a recovery position.

(C) Administering First Aid for burns or injuries. (D) Breaking contact with electric source.

vii. Which among the following is the reason will you use to convince your friend that chemistry laboratory must adhere to safety measures.

(A) To get correct results in an experiment (B) To avoid accidents and injuries

(C) To be competent in practical activities (D) To know how to use first aid kit

viii. Chemistry relates with many disciplines. Which discipline deals with physical and chemical processes taking place in the body of organism that is formed when chemistry joins with another discipline?

(A) Organic Chemistry (B) Agro-chemistry (C) Biochemistry (D) Inorganic chemistry

ix. Anna got burn accidentally in chemistry laboratory .Which among the following item can be given to her ?

(A) Antibiotic solution (B) Nitric acids (C) Petroleum jelly (D) Potassium permanganate

Question	(i)	(ii)	(iii)	(iv)	(v)	(vi)	(vii)	(viii)	(ix)
Answer									

2. Answer question (i)-(iv) by matching the uses in **LIST A** with corresponding components of First Aid Kit in **LIST B** then write letter of correct answer in the bracket provided.

LIST A	LIST B
(i) Contains guidelines on how to use items in the First Aid Kit.	A .Sterile gloves
(ii)It is used to secure bandage.	B. Antiseptic
(iii) Covering the small cuts or wounds to protect them from dirty and germs.	C. Plaster or adhesive bandage
(iv) Reducing muscle pains..	D. Cotton wool
(v) Cleaning wounds to kill germs.	F. Clinical thermometer
	G. Soap
	H. Bandage

LIST A	(i)	(ii)	(iii)	(iv)	(v)
LIST B					

SECTION B (70 Marks)

Answer all questions

3. (a) Who is chemist?.....

(b) Describe with relevant examples how chemistry is applied in our daily life ?

i.....

ii.....

iii.....

iv.....
.....
.....

v.....
.....
.....

4 (a) Some apparatus in the chemistry laboratory are said to be made up of glass materials .Mention three apparatus in the laboratory that are made of glass materials and state the function of each apparatus.

i.....
.....

ii.....
.....

iii.....
.....

(b) Harun is a form one student from Magembe Secondary School who got accidents and injuries when he was conducting experiments in the chemistry laboratory. Which could be the causes of those accidents and injuries ?

i.....
.....

ii.....
.....

iii.....
.....

iv.....
.....

5. Malika accidentally fell in the chemistry laboratory and it was found that he was unconscious. Two students helped him to recover from the condition.

(a) What process was done by the two students?

.....

(b)What is the name given to the two students?

.....

(c)What are the three qualities of the two students who gave help to Malika?

i).....

ii).....

iii).....

(d) Briefly explain five reasons of giving the process identified in (i) above.

i).....

ii).....

iii).....

iv).....

v).....

6. During an experiment a form one student inhaled concentrated nitric acids immediately he fallen down and lost consciousness with foams in nostrils and mouth. After teacher getting report he advised other students to use the labeled and closed chemicals.

(a) Which condition might a student suffered from and why?

.....

.....

.....

.....

.....

(b) Why teacher did advised students to use the closed and labeled chemicals in the laboratory?

i.

ii.

iii.

iv.

7. Usually the safety symbols help the users to understand the possible accidents/effects when using a certain item. Describe the warning sign expected to be seen on the container of the following substances.

(i) A match box

.....

(ii) Concentrated hydrochloric acid

.....

(iii) A rat poison

.....

(iv) Methylated spirit

8. (a) What is chemistry laboratory?

(b) Students must understand guidelines to follow before performing any practical activities in the laboratory in order to avoid accidents and injuries. As a competent student in this part how will you explain to your fellows about this in order to avoid accidents and injuries?

i).....

ii).....

iii).....

(iv).....

9. (a) Explain how chemistry cooperates with the following disciplines.

(i) Agriculture.....

(ii) Biology.....

(iii) Pharmacy.....

(b) Why laboratory safety measures are important to it's users?

SECTION C: (15 MARKS)

10. Professor Makenya is an agricultural specialist. In several of his public speeches he insists that the success in agriculture and animal husbandry bears a secrete enclosed in chemistry and chemical realities. In only five points prove the truth in professor Makenya's notation.
