WhatsApp 0748978398

SECTION A (15 Marks)

1. Answers

(i)	(ii)	(iii)	(iv)	(v)	(vi)	(vii)	(viii)	(ix)	(x)
B	A	A	D	B	D	B	A	A	C

@ 01 mark = 10 marks

2.

Answers

LIST A	(i)	(ii)	(iii)	(iv)	(v)
LIST B	E	D	B	C	I

@01mark = 05 marks

SECTION B (70 Marks)

3(a)(i) Its components (Sodium and chlorine) have different properties from those of the resulting compound.(Sodium chloride).

(ii) Its components can be separated by chemical means.

(iii) It is formed only by chemical reaction.(Energy is given out or taken in form of heat and light)

(iv) Whenever it is formed, the components in it combine in definite proportion.

@1.5 mark =

06 marks

(b) Difference between Tea (mixture) and sugar (compound)

Sn	Tea mixture	Sugar compound
i.	Components can be separated by physical methods	Components can be separated by chemical methods
ii.	Tea (mixture) may vary widely in composition.	Compounds (sugar) has definite (fixed) composition by mass.
iii.	No chemical change occur when mixture are formed.	Chemical change are involved when sugar (compound) is formed.
iv.	The properties of tea (mixture) are those of individual components.	The properties of compounds are different from individual components.

@01mark = 04 marks

4. (a)

- (i) It is potable
- (ii) It produce both types of frame.
- (iii) It is very hot
- (iv) It is safe to use.
- (v) It is easy to control.

Any 4 points @1.5 mark = 06marks

(b)

- (i) Kerosene stove.
- (ii) Gas stove.
- (iii) Spirit lamp.
- (iv) Charcoal burner.
- (v) Electric burner

Any 4 points @01mark = 04 marks

5. (a)

(i) Filtration

(ii) Fractional distillation.

(iii) Solvent extraction

(iv) Evaporation.

(v) Sublimation

(vi) Layer separation.

@01mark = 06 marks

(b) (i) In study of blood cell, It help detecting type of drug in blood.

(ii) To test for water pollution, soil pollution and air pollution. Test for food contamination.

(iii) For testing purity or composition of organic substances to separate mixtures.

(iv) To analyse blood in crime scenes.

Detect different fibres.

Drug testing.

@01mark = 04 marks

6. (a)

(i) Valency: Is the combining power/capacity of an element or radical.

(ii) Isotopy: Is the existence of atoms of the same element to have same atomic number but different mass number.

@01mark = 02 marks

(b) (i) The electronic configuration of Z is 2:8:7

(ii) The chemical formula is WZ_2

(iii) The valency of W is 2

(iv) Ionic/electrovalent bond: Because it is formed between metal and nonmetal.

(v) W belong to group II and period 3

(vi) The actual name of Z is chlorine.

@01mark = 06 marks

SOLUTION

Balancing equation 1 mark @, Net ionic equation @ 1.5 mark (Total 10 marks)

8.(a)

- i. Au
- ii. Cu
- iii. Na
- iv. K
- v. Sn
- vi. Ag
- vii. Hg @ 1 mark (Total 7 marks)

(b) Advantages of chemical symbols

(i) Quickly understand the elements being referred to instead of memorizing the full names.

(ii) Help to write chemical equations in abbreviated forms instead of writing each element in its full names.

(iii) Distinguish one element from the other

@ 1 mark (total 3)

9.(a)

1	L							
2								M
3				N		O		
4		P						

(b)

- i. O
- ii. N
- iii. M
- iv. P
- v. L @ 1 mark(total 5 marks)

10.

Introduction: Meaning of neutralization reaction (2 marks)

Main body: Any six points about the application of neutralization reaction (@ 2 marks)

- i. Treating insects –stings and bites
- ii. Relieving in digestion
- iii. Soil treatment
- iv. Treating factory wastes
- v. Preventing formation of acidic rain.
- vi. Neutralizing accidental spills
- vii. Manufacturing fertilizers

Conclusion (1 mark)
